

IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

Cisco Networking Academy

Networking Internship

Cisco Networking Academy Program | Delivered by IILM University

Yadav Hitesh Shravan

Roll No. 2410031458 | Section 3CSE8 | B.Tech CSE

15 May 2026 – 15 June 2026

Yadav Hitesh Shravan

B.Tech – Computer Science & Engineering

ABOUT THE STUDENT

Candidate Profile

ROLL NUMBER

2410031458

INSTITUTE

IILM University, Greater Noida, U.P.

PROGRAMME

B.Tech CSE, Section 3CSE8, Batch 2024-2028

INTERNSHIP DOMAIN

Cisco Networking Academy — Networking

DURATION

15 May 2026 – 15 June 2026

ABOUT THE PROGRAM

Cisco Networking Academy at IILM

The Cisco Networking Academy is Cisco's global IT skills and career-building program, delivering structured courses in network simulation and core networking fundamentals. At IILM University, Greater Noida, the program is delivered by the School of Computer Science and Engineering under Instructor Mr Abhinav Raghav, giving engineering students hands-on exposure to enterprise networking concepts and tools using Cisco Packet Tracer.

Cisco-Certified Curriculum

Structured Cisco Networking Academy course content delivered end to end.

IILM University Delivery

Delivered by the School of Computer Science and Engineering, IILM University.

Instructor-Led

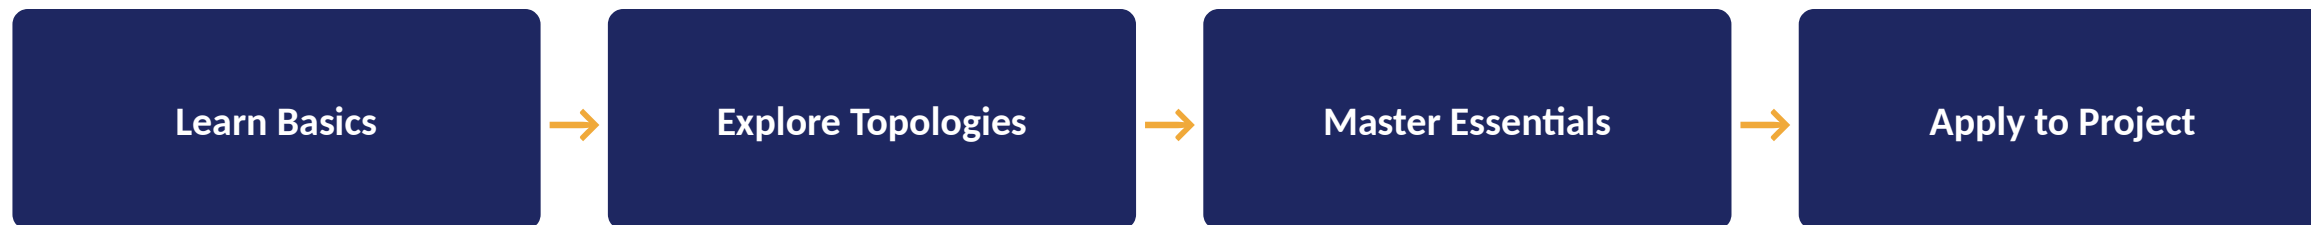

Guided throughout by Mr Abhinav Raghav, Instructor, IILM University.

PROBLEM STATEMENT

Bridging Theory and Practical Networking

Many engineering students learn networking concepts such as IP addressing, VLANs, routing, and switching only at a theoretical level, with limited hands-on practice designing, configuring, and troubleshooting an actual network. This internship addressed that gap through structured, simulation-based training in Cisco Packet Tracer, followed by an applied branch-office network design and fault-diagnosis project.

This internship addressed that gap — practically applying core networking concepts:

What the Internship Set Out to Achieve

Design the Topology

Plan device layout, VLAN structure and IP addressing in Packet Tracer.

Explore Devices & Links

Connect and configure devices to observe practical networking behaviour.

Master Networking Essentials

Learn addressing, subnetting, switching and routing fundamentals.

Apply VLAN & ACL Security

Segment traffic with VLANs and filter it using ACLs and NAT.

Practice Fault Diagnosis

Inject and troubleshoot faults across the simulated network.

Build a Python Assurance Tool

Match symptoms to documented faults and suggest fixes.

The Toolkit Behind the Internship

Packet Tracer

Network simulation

NetAcad Platform

Course delivery

VLANs & Trunking

Traffic segmentation

DHCP & DNS

Addressing & resolution

Static Routing

Inter-network paths

ACL

Traffic filtering

NAT

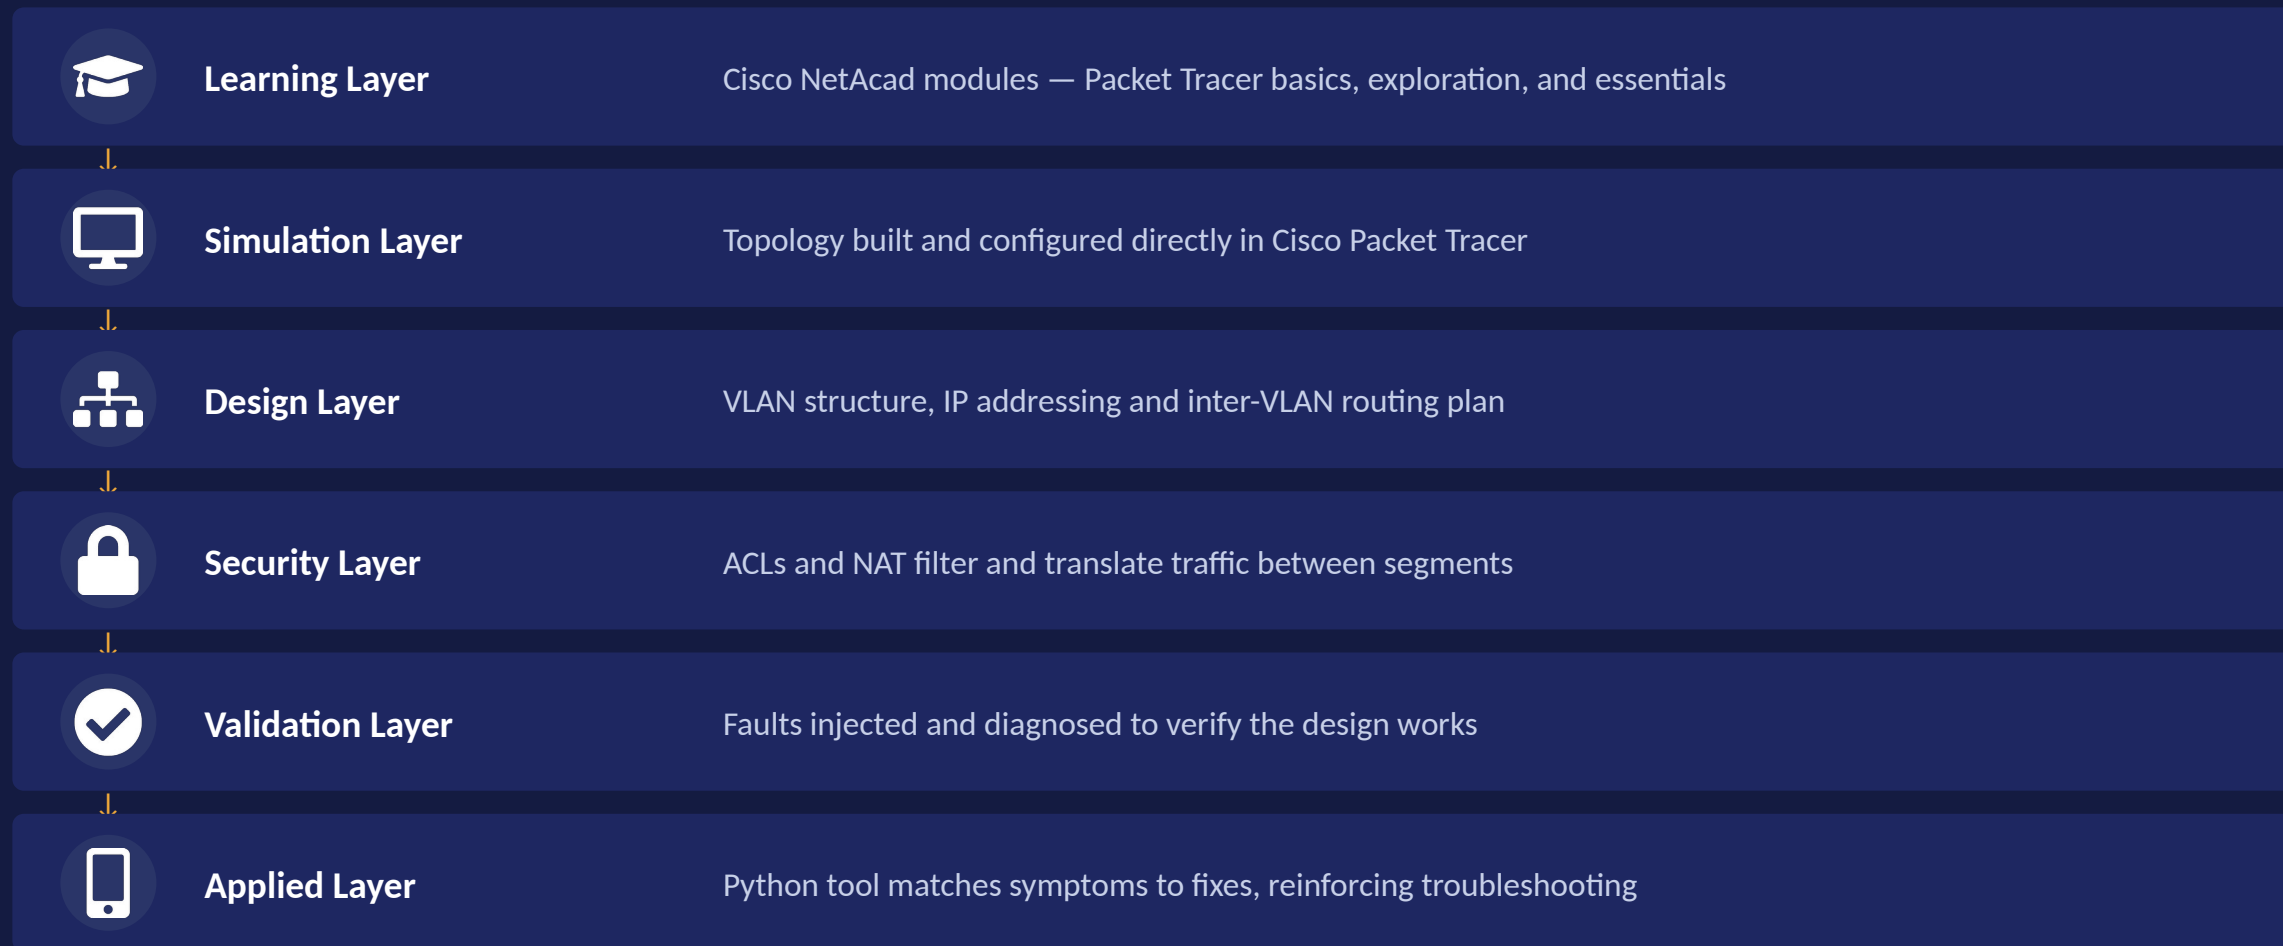

Internet access

Python

Fault-diagnosis tool

From Learning Modules to Applied Network

The Learning-to-Application Journey

1

MODULE

Getting Started with Cisco Packet Tracer

Interface, device palette, and basic simulation workflow

16 Jun 2026

2

MODULE

Exploring Networking with Cisco Packet Tracer

Building and connecting devices to explore networking behaviour

16 Jun 2026

3

MODULE

Networking Essentials

Core fundamentals — addressing, subnetting, switching, routing

20 Jun 2026

4

MODULE

Applied Project — SmartBranch 360

Branch-office network design, fault injection and Python diagnosis tool

Following completion

EXPECTED OUTCOMES

Skills and Capabilities Gained

Working familiarity with the Cisco Packet Tracer environment and simulation workflow

Practical understanding of core networking essentials — addressing, subnetting, switching and routing

Ability to design a segmented network using VLANs, inter-VLAN routing, DHCP, DNS, ACLs and NAT

Hands-on experience diagnosing and fixing simulated network faults

Skill to build a Python tool that matches symptoms to documented faults and fixes

Three Cisco Networking Academy certificates of completion, issued by IILM University

CERTIFICATION

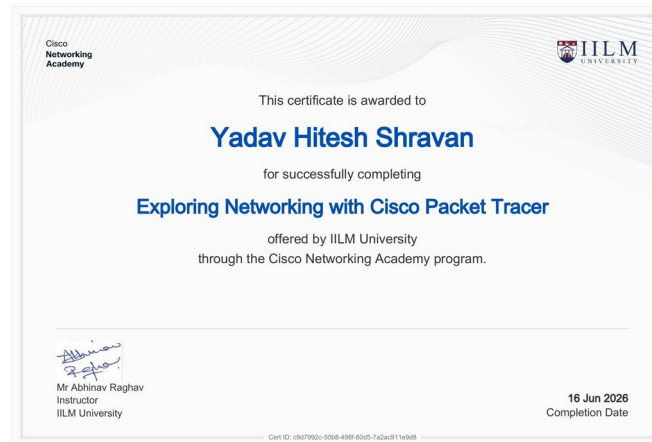

Certificates of Completion

Getting Started with Cisco Packet Tracer

Completed: 16 Jun 2026

Cert ID: 1be6d875-6098-4d0e-a327-88b4b1cd8c67

Exploring Networking with Cisco Packet Tracer

Completed: 16 Jun 2026

Cert ID: c9d7992c-50b8-498f-80d5-7a2ac911e9d8

Networking Essentials

Completed: 20 Jun 2026

Cert ID: 03b4dcf6-d0a2-40ca-b4ac-f427d44ff1a1

Thank You
